### DESIGN

Investigation of excessive crank gear vibration and bearing loading by means of a multibody finite element analysis for a vertical reciprocating compressor and proposed mitigation measures	
by: Roger Keller – BURCKHARDT COMPRESSION	15
Compressor and valve challenges in energy transition: the experience on LNG and Hydrogen applications by: Massimo Schiavone, Andrea Raggi, Giovanni Ballerini – COZZANI	25
<b>Reversible operation of a reciprocating compressor as an expansion machine</b> by: Christian Stöckel, Konrad Klotsche, Christiane Thomas – TECHNISCHE UNIVERSITÄT DRESDEN	36
<b>Reciprocating Steam Compression Applications in Energy Decarbonization</b> by: Matt Janssen – VAPOR LOCOMOTIVE	43
DIGITALIZATION & AL	
Design Automation and Machine Learning in API 618 Reciprocating Compressors by: Niccolò Batini – BAKER HUGHES; Niccolò Becattini, Gaetano Cascini – POLITECNICO DI MILANO	57
Real-World Compressor Fault Detection for Digital Twin Environments	

Using Transfer Learning to Construct Accurate Data-driven Compressor Models on Limited datasets of Field	
by: Gautham Ramchandran, Evangelia Konstantopoulou, Panagiotis Koutsivitis, Nils-Henning Framke – GAMMA TECHNOLOGIES	65

by: Jonah Poort, Rens Bazuin – TNO

EFRC PAPER	
<b>Constrained layer damping for small-bore side branches</b> by: Irma Meijer. Can Tümer, Jan de Vreugd – TNO	87
Diaphragm compressors for hydrogen service: inventory of operational challenges and feasibility of diaphragm optimization	
by: Cyril Wentzel – WENTZEL DYNAMICS; Leonard van Lier – TNO	95
HYDROGEN COMPRESSION	
<b>Reciprocating Compressors and the Hydrogen Economy</b> by: Ben Williams – ARIEL	109
Wear Mechanisms of High-Pressure Hydrogen Sealing Materials by: Michael Schöbel – LEOBERSDORFER MASCHINENFABRIK; Marc Langela – STASSKOL	117
Experimental and numerical investigation on the sealing capability of a high pressure, dry running, hydrogen reciprocating compressor	
by: Giorgio Taurian – SIAD; Paul Modern – COOK COMPRESSION; Giovanna Barigozzi, Nicoletta Franchina, Elisa Ghirardi, Otman Kouaissah – UNI BERGAMO	, 123
Efficient H <sub>2</sub> compression with Pistons & Diaphragms – Recips as a keystone of the energy transition by: Jens Wulff – NEUMAN & ESSER	132
MONITORING & RELIABILITY	
Identifying capacity control related problems using condition monitoring by: Thorsten Bickmann, Fayyaz Qureshi – BENTLY NEVADA	141
Upgradation of Compressor Lubrication System from Pump-to-Point "to" Divider Block in Worthington and BPCL Compressors of Oil India Limited & benefits obtained by: Amarish Kamalapuri, Prateek Baruah – OIL INDIA	151
Impact versus Impact – Comparison of different filter modes for vibration measurement by: Jan Löken – PROGNOST	165

CONTENTS

## **PULSATION & VIBRATION**

Effect on Pulsation and Vibration Mitigation Measures when Adjusting a Natural Gas System to Hydrogen M by: André Eijk – INDEPENDENT CONSULTANT	i <b>xtures</b> 1 <i>7</i> 3
<b>On solving torsional vibration problems of reciprocating compressor systems</b> by: David Richter-Trummer, Andreas Thalhammer, Thomas Bozezki – GEISLINGER	185
Optimizing the torsional vibration behavior of reciprocating compressors using a flywheel-integrated dampe concept	r
by: Sebastian Willeke, Stephan Bohmeyer, Norbert Reinsperger and Michael Steidl – HASSE & WREDE	195
<b>Green hydrogen can also pulsate – Successful use of a Helmholtz resonator</b> by: Johann Lenz; Franz-Josef Düttmann – KÖTTER CONSULTING	206
Pulsation control for a multi-purpose underground storage reciprocating compressor system (natural gas, hy and mixed gas)	drogen
by: Leonard van Lier – TNO; Olivier Bore – STORENGY	214
Improved plant reliability due to acoustical and vibrational optimisation by: Patrick Tetenborg, Christian Jansen – JANSEN + TETENBORG	225
SEALING & EMISSIONS	
<b>A non-lube sealing system in a high-pressure fuel gas compressor – field experience</b> by: Felix Ragg – BURCKHARDT COMPRESSION	237
Improved plant reliability due to acoustical and vibrational optimisation by: Bernhard Fritz, Georg Meyer, John Ladd – HOERBIGER	245
A simplified approach to the design of nitrogen purge systems to improve safety and reduce emissions by: Guido Pratelli, Christian Prinz – HOERBIGER	253
Overcoming reliability challenges of sealing highpressure hydrogen diaphragm compression stages by: Marije Oosterlaak, Rens Hulstijn, Yann Ardouin – HOWDEN	262

by: Marije Oosterlaak, Rens Hulstijn, Yann Ardouin – HOWDEN

**CONTENTS** 

ARIEL	
Reciprocating Compressors and the Hydrogen Economy by: Ben Williams – ARIEL	109
BAKER HUGHES	
Design Automation and Machine Learning in API 618 Reciprocating Compressors by: Niccolò Batini – BAKER HUGHES; Niccolò Becattini, Gaetano Cascini – POLITECNICO DI MILANO	57
BENTLY NEVADA, A BAKER HUGHES BUSINESS	
Identifying capacity control related problems using condition monitoring by: Thorsten Bickmann, Fayyaz Qureshi – BENTLY NEVADA	141

## COZZANI

Compressor and valve challenges in energy transition: the experience on LNG and Hydrogen applications by: Massimo Schiavone, Andrea Raggi, Giovanni Ballerini – COZZANI	25
GAMMA TECHNOLOGIES	
Real-World Compressor Fault Detection for Digital Twin Environments by: Gautham Ramchandran, Evangelia Konstantopoulou, Panagiotis Koutsivitis, Nils-Henning Framke – GAMMA TECHNOLOGIES	65
GEISLINGER	
On solving torsional vibration problems of reciprocating compressor systems by: David Richter-Trummer, Andreas Thalhammer, Thomas Bozezki – GEISLINGER	185
HASSE & WREDE	
Optimizing the torsional vibration behavior of reciprocating compressors using a flywheel-integrated damp	er
<b>concept</b> by: Sebastian Willeke, Stephan Bohmeyer, Norbert Reinsperger and Michael Steidl – HASSE & WREDE	195
HOERBIGER	
Improved plant reliability due to acoustical and vibrational optimisation by: Bernhard Fritz, Georg Meyer, John Ladd – HOERBIGER	245
A simplified approach to the design of nitrogen purge systems to improve safety and reduce emissions by: Guido Pratelli, Christian Prinz – HOERBIGER	253

HOWDEN	
Overcoming reliability challenges of sealing highpressure hydrogen diaphragm compression stages by: Marije Oosterlaak, Rens Hulstijn, Yann Ardouin – HOWDEN	262
INDEPENDENT CONSULTANT	
Effect on Pulsation and Vibration Mitigation Measures when Adjusting a Natural Gas System to Hydrogen Mixtures by: André Eijk – INDEPENDENT CONSULTANT	173
JANSEN + TETENBORG	
Improved plant reliability due to acoustical and vibrational optimisation by: Patrick Tetenborg, Christian Jansen – JANSEN + TETENBORG	225
KÖTTER CONSULTING	
Green hydrogen can also pulsate – Successful use of a Helmholtz resonator by: Johann Lenz; Franz-Josef Düttmann – KÖTTER CONSULTING	206
LEOBERSDORFER MASCHINENFABRIK	
Wear Mechanisms of High-Pressure Hydrogen Sealing Materials by: Michael Schöbel – LEOBERSDORFER MASCHINENFABRIK; Marc Langela – STASSKOL	117
NEUMAN & ESSER	
Efficient H <sub>2</sub> compression with Pistons & Diaphragms – Recips as a keystone of the energy transition by: Jens Wulff – NEUMAN & ESSER	132

## OIL INDIA

Upgradation of Compressor Lubrication System from Pump-to-Point "to" Divider Block in Worthington and Compressors of Oil India Limited & benefits obtained	BPCL
by: Amarish Kamalapuri, Prateek Baruah – OIL INDIA	151
POLITECNICO DI MILANO	
Design Automation and Machine Learning in API 618 Reciprocating Compressors by: Niccolò Batini – BAKER HUGHES; Niccolò Becattini, Gaetano Cascini – POLITECNICO DI MILANO	57
PROGNOST	
Impact versus Impact – Comparison of different filter modes for vibration measurement by: Jan Löken – PROGNOST	165
SIAD	
Experimental and numerical investigation on the sealing capability of a high pressure, dry running, hydro reciprocating compressor by: Giorgio Taurian – SIAD; Paul Modern – COOK COMPRESSION; Giovanna Barigozzi, Nicoletta Fran Elisa Ghirardi, Otman Kouaissah – UNI BERGAMO	<b>gen</b> achina, 123
STASSKOL	

Wear Mechanisms of High-Pressure Hydrogen Sealing Materials by: Michael Schöbel – LEOBERSDORFER MASCHINENFABRIK; Marc Langela – STASSKOL 117
